**ABSTRACT:**

**PURPOSE:** To provide a deodorant which is effective to malodorous components contg. many aldehydes, is extremely durable and is free from problems of a stimulative property, etc., deodorant fibers formed by using this deodorant, a process for producing the same and a deodorization processed body.

**CONSTITUTION:** This deodorant is formed by using  $\geq 1$  kinds of the compds. selected from a hydrazine deriv. group having solubility in water of  $\leq 5\text{g}/\text{L}$  at  $25^\circ\text{C}$  or a mixture composed of these compds. and an inorg. material group having adsorbability as its active ingredient. These deodorant fibers are formed by fixing this deodorant onto fiber surface by a water-resistant binder resin. This deodorization processed body is formed by injecting the deodorant into a film or sheet structure.
